Professional Water Technologies Welcomes Miller Truby, Regional Account Manager

Vista, CA, August 4, 2011 – Professional Water Technologies (“PWT”), specialized in reverse osmosis specialty chemicals and membrane forensics services, announces the addition of Miller Truby to its team as Regional Account Manager. "Miller has a valuable skill set focused on reverse osmosis, nanofiltration, ultrafiltration, and various other related filtration and separation technologies," says David Russell, VP Specialty Chemicals and Services. "As we expand our service offering across North America, Miller's experience in the field will no doubt be appreciated by our customers. Today more than ever, membrane systems plant operators value the knowledge and technical know-how that a seasoned professional such as Miller can bring to their plant's operations".

Prior to joining the PWT team, Miller was part of the Technical Service department for Toray Membrane USA. His duties included supporting the membrane manufacturer's technical analyses, membrane systems start-up as well as troubleshooting systems in operation. In addition, Miller is a Director of SWMOA (Southwest Membrane Operators Association), a member of IDA (International Desalination Association) and AMTA (American Membrane Technology Association). He has also co-authored many technical papers on reverse osmosis membrane construction, operation and maintenance that he presented at industry conferences.

Miller's primary responsibilities at Professional Water Technologies will include technical support for PWT's existing client base and identifying new commercial opportunities in the Southwest United States. Miller can be reached at Miller.Truby@pwtchemicals.com, by phone at 760-639-4400 or on his mobile phone at 480-721-7380.

About Professional Water Technologies

Professional Water Technologies develops, manufactures and sells specialty chemicals for industrial and commercial reverse osmosis (RO) processes. Its environmentally friendly phosphate-free super-concentrated antiscalants are eleven times more concentrated than standard antiscalants,

reducing shipping/handling by 90% and reduce drum disposal requirements. With a complete line of RO pretreatment and maintenance products, comprehensive analytical and technical capabilities, and a progressive research and development group, PWT offers solutions to maximize the efficiency and economy of RO operations.
