## **Professional Water Technologies Welcomes Stella Lanphear, Regional Sales Manager**

**Vista, CA, September 19, 2011** – Professional Water Technologies (“PWT”), specialized in reverse osmosis specialty chemicals and membrane forensics services, announces the addition of **Stella Lanphear** to its team as **Regional Sales Manager**. “Stella has significant and wide-ranging expertise in water treatment, manufacturing, project management and new technology implementation”, says David Russell, VP Specialty Chemicals and Services. “As we develop our internal and external sales force, reaching out for new regions and countries – supported by the recent addition of Miller Truby as Regional Account Manager for the Southwest States and the signature of a sales representation agreement with Swiss company Omya two weeks ago –, Stella’s hands-on engineering professionalism together with her interpersonal and professional skills will be considerable assets to PWT’s growing exposure.”

Prior to joining the PWT team, Stella worked more than 10 years for Pepsi-Cola as Principal Research Engineer, providing her expertise on water as a product and as an ingredient, and managing projects for commercialization of new products. She also occupied various positions developing procedures and protocols, commissioning equipment and providing training in the pharmaceutical and water treatment fields, amongst others.

Stella’s main focus at Professional Water Technologies will be to develop new sales opportunities in the East Coast States and support PWT’s clients of chemicals and systems both technically and commercially. Stella can be reached by e-mail at [Stella.Lanphear@pwtchemicals.com](mailto:Stella.Lanphear@pwtchemicals.com), or on her mobile phone at 203-581-2482.

### **About Professional Water Technologies**

Professional Water Technologies develops, manufactures and sells specialty chemicals for industrial and commercial reverse osmosis (RO) processes. Its environmentally friendly phosphate-free super-concentrated antiscalants are eleven times more concentrated than standard antiscalants, reducing shipping/handling by 90% and reduce drum disposal requirements. With a complete line of RO pretreatment and maintenance products, comprehensive analytical and technical capabilities, and a progressive research and development group, PWT offers solutions to maximize the efficiency and economy of RO operations.
