SpectraGuard™ 360 is a high performance blended antiscalant/dispersant with broad spectrum scale inhibition, enabling stable performance by complete control of the feed water chemistry. Capable of controlling carbonates, sulfates, phosphates, metal hydroxides, silica and particulates, SpectraGuard™ 360 provides full protection of the membrane system from a multitude of feed waters. The superior performance of this product enables lower dosage rates to provide the same control as traditional phosphonate chemistries.

Features / Benefits

- Using a proprietary blend of polymers and phosphonates this formula provides added control of membrane fouling in waters with high salts, high silica and colloidal foulants
- Higher performance allows for lower dose rates than existing formulations
- Stable molecular structure maintains integrity in high pH, high temperature and high salinity applications
- Classified for use in membrane systems producing drinking water (ANSI/NSF Standard 60)

Uses

- Control of calcium carbonate, calcium sulfate, barium sulfate, calcium fluoride, silica, and hydroxides of iron and manganese

Packaging

Pail: 5 gallon/18.9 liter  
Drum: 55 gallon/208 liter  
Tote: 275 gallon/1,040 liter  
Bulk: available upon request

For special packaging options, please contact PWT or your local distributor.
General Mixing & Application Instructions for SpectraGuard™ 360

1. Typical dose rates are 1.0 to 5.0 mg/l

2. Contact Professional Water Technologies™ or your local distributor for custom chemical dosing recommendation

ProDose XPRT™ – Scaling Prediction Software
ProDose XPRT™ uses the most accurate scaling prediction calculations available to accurately determine effective antiscalant dosage, and cleaning chemical usage. The user can enter multiple cases to study various operating conditions, directly enter concentrate analysis, and select the best PWT product and dosage for the application.

ProDose XPRT™ is available upon request only. Please contact your PWT representative for more information.
